

This image is a composite of three fragments of a topographic map, arranged in a triangular pattern. Each fragment shows a different section of a landscape, characterized by dense contour lines indicating elevation. The top-left fragment includes a large, dark, irregularly shaped area representing a body of water, possibly a lake or a reservoir, surrounded by a grid-like pattern of lines that might represent a city or a planned area. The top-right fragment shows a more continuous, hilly terrain with numerous contour lines. The bottom fragment is the largest and shows a wide, flat area, possibly a valley or a plain, with a river or stream flowing through it. Each fragment has a compass rose in the upper right corner, indicating the orientation of the map. The fragments are separated by white lines, suggesting they are pieces of a larger map.
